

ROBSON ALVES

37 years old, married, Brazilian, 1 child

Rua Francisco Lamas, 55 - CEP: 08780790

Mobile: +55 11 95040-5840 | Email: robson.info@gmail.com / hi@robsonalves.online

Website: robsonalves.online

PROFESSIONAL SUMMARY

I bring extensive experience in DevOps, cloud architecture, and software engineering, demonstrated through this comprehensive career history. I am characterized as persevering, insightful, and positive, with a constant focus on professional growth and success. I work effectively in teams, take responsibility seriously, and continuously seek new challenges and experiences to expand my expertise.

LANGUAGES

English

Level: B2 (Upper Intermediate / Professional Working Proficiency)

Fluent in professional contexts, technical documentation, and business communication

Portuguese

Level: Native Speaker

Mother tongue - Full professional proficiency

PROFESSIONAL EXPERIENCE

DevOps Engineer

March 2024 - Present

Prezensa Consultant (Veloce - Alelo/Elopar)

- Manage multiple AWS accounts and EKS clusters with extensive use of SQS, SNS, SES, DynamoDB, RDS
- Work with multi-cloud environments: AWS, Azure, and Oracle Cloud Infrastructure (OCI)
- Operate in self-organized DevOps/SRE team ensuring resilient, scalable, and up-to-date services
- Active involvement in cloud security: vulnerability addressing, hardening, compliance best practices
- Lead continuous improvement initiatives across multiple teams

Tools: GitLab, Python (Django), ReactJS (Next.js), Java, Flutter (Mobile), Docker, docker-compose, WAF, AWS, Azure, Azure DevOps, OCI, Terraform, Terragrunt, ServiceNow, FinOps

DevOps Engineer / SRE / Head of Tech

March 2020 - March 2024

Vittude

- Owned AWS infrastructure and CI/CD processes using GitLab, Docker, optimizing velocity and consistency
- Temporarily assumed Head of Tech role (Dec 2020) coordinating team around company OKRs
- Single-handedly resolved DDoS attack: implemented traffic splitting, AWS WAF, blocked malicious requests globally
- Automated various activities using Python, Shell, and AWS resources
- Enhanced vittude.com platform and tech-dependent processes including Back Office, CS/CX, finance

Tools: GitLab, Python (Django), ReactJS (Next.js), Docker, docker-compose, AWS WAF

Platform Engineer / SRE

March 2019 - February 2020

TeamIT - FullTime

- **Waitrose (UK):** Maintained large-scale e-commerce platform with thousands of services
- Worked with Jenkins, Ansible, CloudFormation, AWS, GCP, NodeJS, .NET, Python lambdas
- **Anova:** Managed IoT platform handling massive telemetry data on Azure AKS
- Used Terraform (Terragrunt), Azure DevOps for distributed database infrastructure

Tools: Azure DevOps, Python, ReactJS (Next.js), Docker, docker-compose, Kubernetes (AKS), Terraform, Terragrunt

DevOps Engineer

May 2017 - March 2019

Webjump

- Created automation tools for application deployments using AWS SDK (Python/TypeScript)
- Implemented IaC with CloudFormation (Nested Templates) for continuous delivery pipelines
- Worked with Ambev platforms using Fargate/ECS, lambdas, CloudFront, RDS, DocumentDB
- Created first Kubernetes cluster with automatic pipeline in Azure DevOps (3 environments)
- Production environment running microservices with Traefik, AutoScaler, HPA, NewRelic telemetry

Tools: AWS, EKS, NewRelic, Azure DevOps, Magento, PHP, Node.js, Serverless Framework, Kubernetes

ALM / DevOps Consultant

March 2014 - May 2017

ESX

Client Allocation: Microsoft

Feb 2015 - Sep 2016

Cloud Solutions Architect (Green Badge)

- Cloud Solutions Consultant for Microsoft Azure (via ESX partnership)
- Assisted customers in Azure infrastructure setup and migrations from AWS/Mandic to Azure
- Designed PaaS and IaaS solutions with optimal pricing and automated resource deallocation
- Built infrastructure as code using ARM templates and PowerShell
- Gathered requirements, designed solutions with diagrams, coordinated implementation

Tools: Azure Stack, PowerShell, ARM Templates, Visio, Docker

As ALM/DevOps Consultant, I served various clients providing DevOps expertise and automation solutions:

- Consulted various clients on DevOps culture and project automation solutions
- Created pipeline patterns for microservices with Java 8, implementing observability and traceability
- Set up automated tests with Postman, JUnit, Selenium using Azure DevOps
- Implemented GitOps with Flux CD, Kubernetes tools (Weave Scope, Kubedash, ELK)
- Taught clients agile frameworks (Scrum, Kanban), CI/CD best practices

Tools: Kubernetes, AWS, Jenkins, SonarQube, Dynatrace, ELK, Prometheus, Grafana, Azure DevOps, Flux CD

Web Developer Senior

July 2012 - March 2014

Sofhar (Prodesp - São Paulo State Education)

- Technical leadership for São Paulo State Education Department systems
- Architected and implemented Azure Virtual Machines, Web API solutions with scalability
- Migrated Oracle database structure to SQL Server, developed ETL routines with SSIS and C#
- Implemented continuous delivery with VSTS, Git pull requests, automated builds, release management
- SQL Server performance tuning, Scrum methodology implementation

Tools: SQL Azure/On-Premises, SSIS, Web API, Oracle, VSTS, Git, C#, .NET

Web Programmer

July 2011 - July 2012

G & P Projects and Solutions (Prodesp - São Paulo State Education)

- Joined critical delivery projects: diploma printing system with direct stakeholder contact
- Developed school board project using MVC4 from scratch, delivered on time
- Became technical leader of Class Assignment project for State Education
- Direct communication with stakeholders ensuring alignment with education standards

Tools: ASP.NET MVC4, .NET Framework, SQL Server

Senior Web Analyst

March 2010 - July 2011

Convergência (Department of Roads)

- On-site service provider maintaining and enhancing legacy systems
- Developed new solutions using .NET Framework 3.5/4.0, SQL Server 2000-2008
- Database analysis, modeling, and development for system implementations
- Gathered functional and non-functional requirements, direct customer contact
- Legacy maintenance in Classic ASP, VB6, and Flex

Tools: .NET Framework, SQL Server, Classic ASP, VB6, Flex

Analyst / Programmer

January 2009 - March 2010

Principia Software (Department of Roads)

- Maintained and enhanced legacy systems for Department of Roads
- Developed new solutions using .NET Framework 3.5 and SQL Server 2005
- Database analysis, modeling, and development
- Implemented 3-layer architecture, decoupling business logic for better code reuse

Tools: .NET Framework 3.5, SQL Server 2005, N-tier Architecture

Analyst / Programmer

June 2008 - January 2009

Senior Solution (Pension & Insurance)

- Developed solutions for private pension schemes and life insurance systems
- Used SSIS to interconnect legacy systems across multiple companies
- MetLife project: lucky numbers management system capitalization
- FUVUP project (BrasilPrev): corporate pension plans simulation system

Tools: SQL Server, SSIS, .NET Framework

Analyst / Programmer

October 2007 - May 2008

Sofhar Gestão & Tecnologia (Department of Roads)

- Production systems maintenance: corrective maintenance and system enhancements
- Direct contact with users to implement changes, delivered updated user manuals
- System documentation creation and analysis using UML
- Developed new systems for users according to business rules
- Full product delivery to maintenance team for production deployment

Tools: .NET Framework, SQL Server, UML

SECURITY & COMPLIANCE

Security Frameworks & Standards

- **OWASP Top 10:** Applied security controls in CI/CD pipelines to prevent injection attacks, broken authentication, XSS, and other common vulnerabilities
- **CIS Controls:** Implemented hardening practices following CIS benchmarks for AWS, Azure, and Kubernetes environments

- **NIST Cybersecurity Framework:** Applied Identify, Protect, Detect, Respond, and Recover principles in infrastructure design and incident response

Security Practices in Daily Work

- **Pipeline Security:** Integrated SAST/DAST tools, dependency scanning, and container image scanning in GitLab CI/CD
- **Infrastructure Hardening:** Applied security baselines, least privilege access (IAM), network segmentation, and encryption at rest/transit
- **Vulnerability Management:** Regular security assessments, patch management, and remediation tracking using Azure Security Center and AWS Security Hub
- **Compliance Automation:** Automated compliance checks using Policy-as-Code (OPA, Sentinel) and Infrastructure-as-Code security scanning
- **Incident Response:** Participated in security incident investigations, DDoS mitigation (WAF configuration), and post-incident reviews

Security Tools & Technologies

AWS WAF, Azure Security Center, GitLab Security Dashboard, Trivy, Snyk, SonarQube, HashiCorp Vault, AWS Secrets Manager, Azure Key Vault, Network Security Groups (NSG), Security Groups, CloudTrail, Azure Monitor, GuardDuty, AWS Config

TECHNICAL SKILLS

Cloud Platforms

AWS (EKS, ECS, Lambda, RDS, DynamoDB, CloudFormation)
Azure (AKS, DevOps, ARM Templates, OCI)
Oracle Cloud Infrastructure (OCI)
GCP

DevOps & Infrastructure

Kubernetes, Docker, EKS, AKS
Terraform, Terragrunt, CloudFormation
GitOps, Flux CD
Jenkins, GitLab CI, Azure DevOps, GitHub Actions

Programming & Scripting

Python (Django, AWS SDK, Automation)
TypeScript/JavaScript (NodeJS, ReactJS, Next.js)
C# / .NET Framework (MVC, Web API, SSIS)
Shell/Bash scripting, PowerShell
SQL (SQL Server, Oracle, DynamoDB)

Monitoring & Security

AWS WAF, Security Hardening
Prometheus, Grafana, NewRelic
ELK Stack, Graylog
Dynatrace

EDUCATION

Master of Business Administration - Full Cycle - Software Engineering AI Track

Status: In Progress | Expected Completion: December 2026

Bachelor's Degree in Computer Science

Faculdade Uniesp

Completion: December 2011

ADDITIONAL ACTIVITIES

Active participation in technology forums and mailing lists. I authored articles for DevMedia and NetCoders communities (in Portuguese). I continuously follow development and technology trends.
